

# MSc. RISK MANAGEMENT

## Statement of Programme Educational Objectives [PEO]

The programme aims to provide candidates with advanced knowledge and managerial skills in applying risk management techniques to solve complex risk management problems. This programme would also enable candidates to manage effectively, professionally, and ethically in an increasingly challenging global business environment. In addition, candidates should be able to embark on lifelong learning and contribute towards nation building.

**Within a few years upon successfully completing the program, graduates (are) will be;**

- Risk management intellectual professionals who critically integrate advanced risk management and technical knowledge in providing novel research solutions to complex risk management problems.
- Risk management intellectual professionals who display sophisticated technical skills with dynamic interpersonal skills in articulating novel empirical research solutions to peers and stakeholders.
- Risk management intellectual professionals who exhibit leadership responsibilities through integration of sophisticated digital and dynamic quantitative/data analysis skills in generating novel research solutions, as well as provision of services/solutions to stakeholders.
- Risk management intellectual professionals who uphold ethical and professional practices by exhibiting optimistic attitude and entrepreneurial mind-set in resolving complex issues through empirical novel research, as well as provision of services/solutions to stakeholders.
